

Effective February 24th, 2012

The Building Department will no longer perform visual inspections in New Single and Multiple Family Dwellings for compliance with New York State Energy Conservation Construction Code, section 402.4.2: Air Sealing and insulation. The only Testing Option that will be accepted for compliance is per section 402.4.2.1: Blower Door Test.

It is the responsibility of the contractor to contact a Certified Blower Test Operator from an approved list of HERS raters or who can submit their certification to the Building Department for consideration of acceptance.
