Re: Hydrant Flushing

*****NOTICE*****

The Highland Water District will be doing its semi-annual maintenance of fire hydrants in the Highland Water District. This will involve flushing the line, by letting the hydrants run for a few minutes, to make sure that the line is clear of any sediment build-up or debris. In an attempt to minimize any inconveniences to residents the service will be performed at night, from 10pm until 5am, for the week of October 16th-October 23rd.

As a result of our service customers may experience some discoloration of water. This is normal, and can be resolved simply by letting the water flow for a short time; roughly 10 minutes. After this, the water should run clear.

If you have any question feel free to call the Water District office at (845) 691-2400 from 8am until 4pm.
