

## **Total Trihalomethanes (TTHM) violation has been lifted as of 2/22/16**

Due to the fact that we were able to use our reservoirs and wells for the last 2 months and our increased flushing program, our last test results for TTHMs brought us under the Maximum Contaminant Level (MCL). Test results received on 2/19/16 from the test sampling date of 2/4/16 were low enough to bring our 4 quarter average below the MCL of 80 parts per billion (ppb).
